Why IRAN CONMINE ?

Inviting and encouraging investors to enter the mining field is a very effective factor in order to realize entrepreneurship and job creation, and it is definitely one of the most important goals and practical plans of the Ministry of SMT (Industry, Mining and Trade). This action will also cause mobility and entrepreneurship in many side businesses such as machinery, tools and equipment, purification and trade (especially export). Iran is located in a region where neighboring countries such as Turkey, Saudi Arabia and Persian Gulf countries need mineral resources due to their economic growth and development. This is while the mentioned countries are very poor in terms of mineral reserves, even though they have sometimes invested in industries such as steel, but their raw materials are imported. This gives us an exceptional opportunity to develop exploitation and extraction. Certainly, the upcoming exhibition, which is the most important annual event of the country in the field of mining, will play a significant role in the realization of the country's economic goals. It is hoped that the audience and those interested will take advantage of the available opportunity.

MINERAL POTENTIAL OF IRAN

Iran is one of the most important countries in the world in terms of huge mineral resources, and with 68 types of minerals and about 100 billion tons of proven and potential reserves in 2014, it was recognized as one of the richest countries in this field. With 1% of the world's population, Iran has 7% of the world's mineral resources. The most important underground and mineral reserves of Iran (apart from oil and gas) are: iron, copper, gold, silver, zinc, lead, chromite, manganese, titanium, uranium, coal, tin, precious and semi-precious stones. Such as turquoise, gypsum, salt, cement, chemicals. According to the above sources, any investment, both domestic and foreign, in the field of extraction and purification, will be one of the most important constructive measures in order to increase economic capacities to achieve sustainable development.

Group of Industry

- Underground and open area mines
- Mining machinery and equipment
- Excavation devices, equipment, machinery and accessories
- Road construction machinery and equipment
- Building construction machinery and equipment
- Tunnel digging and maintenance devices, equipment and machines
- All kinds of drilling machines and equipment
- Devices and equipment related to ore sorting and mineral processing
- Equipment related to the transfer and handling of minerals
- Mine exploration machines and equipment
- Equipment related to smelting and extracting metals
- Construction and decorative stones machines and equipment and tools for cutting and processing decorative stones
- Precious stones
- Mining and environment
- Insurance sector in the mining industry
- Research and development centers and organizations

Group of Industry

- Ports and shipping and transportation in the mining industry
- Mining ventilation systems
- Mineral data processing software and systems
- New technologies in the mining industry
- Explosives and explosive equipment
- Electricity supply and lighting equipment for mines
- Equipment, drainage and water supply of underground mines
- Types of compressors and pumps
- Laboratory devices and equipment and mineral analysis
- Mine safety and health equipment
- Mine maintenance equipment
- Mine equipment, parts and spare parts
- Mining companies and contractors
- Road construction developers and road construction contractors
- Consulting engineers, installation and construction services
- Mining design, services, development and research and modern technology in the mining industry
- Investment opportunities in the mining industry

Our Services

- Booth Design
- Hotels
- Visa Services
- Transportation
- Extra Furniture
- Hall 5 Beach Flags
- Hall 5 Conference Hall
- Hall 5 B2B Meeting Room
- Hall 5 Suspended Structures
- Hall 5 Indoor / Outdoor Advertisements

IRAN CONMINE

This exhibition will be held in the three main sectors of exploration, mining and processing, and all kinds of industries, mineral equipment and machinery, mineral industries, various investment companies, financial and credit institutions and consulting engineers will be present and participating in it. Considering its mineral potential, our country was the first country to start teaching mining and geology among the countries of the region 70 years ago, and currently there are more than 50 thousand engineers and technicians in the fields of mining, metallurgy and earth which are trained and taught the science. The presence of dozens of powerful and active trade unions and industrial organizations in the field of mining is also very significant and important. Some of the aforementioned organizations, such as Iran Mining House, play a wide and effective role in the country's economy.

IRAN CONMINE

Banian Omid Co. Biography

Organizing an international exhibition is a highly specialized activity that requires knowledge, experience and appropriate technology. We are happy that Banian Omid Company, with more than 25 years of activity in this industry, has made it possible to learn the demands and needs of customers, to be aware of the latest knowledge, to access the best human resources and to use the most suitable technical facilities to be able to provide specialized services to its customers. This company was founded in the year 2001 by a group who had years of experience in various fields of the exhibition industry. They have managed to hold 22 international exhibitions during a two-year period at the Milad Exhibition Management and Planning Center (located in Iran International Exhibitions Center in Tehran). This company is the only company in Iran that has managed to hold this number of exhibitions during a 2 years period. This group is the first and undoubtedly the most extensive Iranian company in the field of domestic and international exhibition services. Banian Omid Co. has always tried to be able to handle extensive and different matters in the field of exhibition services through centralized and dynamic groups under macro management system.
